-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 12, 14-19 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mantey in view of SU'021. Mantey teaches a method of protecting a tuyere assembly in a shaft furnace including a clearance between the tuyere (1) and refractory furnace lining (9) filled with removable compressible refractory material (12) where temperature and other parameters for reduction of hot gas leakage are also monitored (see col. 8 line 48 to col. 9 line 15 for example) thereby showing all aspects of the above claims except the continuous monitoring of the clearance width, although Mantey does state that the clearance is to be desirably maintained (see col. 5 lines 4-21 for example). SU'021 teaches that it was known in the art at the time the invention was made to employ a displacement sensor for controlling and monitoring the displacement of a tuyere in a furnace (converter). Because Mantey desires that a clearance be maintained between the tuyere and refractory lining of its furnace, and SU'021 teaches that displacement sensors were known in the art at the time the invention was made to be useful for the monitoring and controlling the displacement of a tuyere in a furnace assembly, motivation to employ a displacement sensor as taught by SU'021 to monitor and control the displacement of the tuyere of Mantey in the furnace in order to maintain the clearance between the tuyere and furnace lining as required by Mantey, would have been a modification obvious to one of ordinary skill in the art at the time the invention was made.

Allowable Subject Matter

Claims 13, 20 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Scott Kastler whose telephone number is (571) 272-1243. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King can be reached on (571) 272-1244. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
